

What are the hazards and how might they harm?

Slip injuries from spillages,
trip injuries caused by
obstructions

Back and muscle strains
from manual handling,
stretching or overreaching

Inhalation injury,
burns, skin irritation from
cleaning chemicals

Bacterial or viral infections
(HIV, hepatitis etc.) from
contact with bodily material

What PPE should the individual wear?

Wear PPE as prescribed in the Task Card for
the cleaning chemical you are using. This is
likely to include gloves and/or goggles.

What other precautions should be taken?

Wear appropriate footwear
with slip resistant soles

Clean up any spillages
immediately

Cleaning external waste bins

Safety Task Card STCGE 17

Unit Managers – use page overleaf to list any hazards and control measures specific to your site which are not listed below

Safe System of Work

1. Always wear gloves when handling waste bins.
2. Erect warning signage before starting and where appropriate use barriers and signage to prevent unauthorised access.
3. Follow the safety precautions in the COSHH Task Card for the chemical being used. This includes wearing PPE such as protective eyewear and gloves.
4. Check that there is no risk of run-off entering surface water drains and contaminating water systems or creating slip hazards.
5. Do not carry out the task when the temperature is low and run-off could freeze.
6. After completing the task remove gloves and wash your hands.
7. Remove all barriers and signage once the task has been completed.

If you have any concerns, stop and speak with your line manager before proceeding.
