(pop-up, tunnel and rotary)

Safety Task Card

STCGE 02

Unit Managers – use page overleaf to list any hazards and control measures specific to your site which are not listed below

## Safe System of Work

- Make sure toasters are positioned on a level and stable surface and away from the edge of a work surface or table.
- 2. Do not position toasters directly below a shelf or cupboard that might be affected by heat from the equipment.
- 3. Do not leave toasters unattended when in use.
- 4. Switch off and isolate the toaster and allow it to cool down before attempting to release any bread or other food that has become jammed inside it and before cleaning.
- 5. Trapped food must not be removed with a metal knife or other metal implement
- 6. Dry food debris should be regularly removed via the crumb collector tray.
- 7. Do not use a water-based solution to clean the inside of the toaster.
- 8. Follow safe manual handling procedures when moving large toasters.

If you have any concerns, stop and speak with your line manager before proceeding.
