MONTHLY SAFETY FOCUS

BAR SAFETY

Routine bar tasks can cause serious injuries when people rush, become distracted or use the wrong technique. This month, use the Bar Safety Conversation with teams who open wine or prepare bar fruit.

When opening sparkling wine, keep your thumb over the cork, loosen but do not remove the cage, then turn the bottle and ease the cork out quietly. Safe use of a lever corkscrew includes using the blade, to remove the foil, cutting away from yourself, then replacing the blade, and using the lever action to remove the cork. When preparing fruit use a stable board and a clean, sharp knife; curl fingertips and always cut away from yourself.

SEE
Incorrect techniques and unsuitable tools; and lack of focus when using a knife.

CARE
Provide correct tools and do not distract colleagues when completing tasks.

SHARE
Discuss the Bar Safety Conversation, coach correct techniques and report incidents or near misses.

MONTHLY UPDATE TOPIC

NEW USE OF LPG TRAINING AVAILABLE

Use WorkJam or the My Learning Portal to access the New Safe Use of LPG Gas Module. This course provides a complete framework for managing mobile and outdoor LPG gas systems safely and legally. Across seven comprehensive modules, users will learn the critical requirements for system setup, component selection and emergency response. The course is intended for anyone involved in setting up, managing or operating LPG equipment and for any managers who need to understand the hazards associated with LPG and how to control them.

01 ACCESS — Find the module through WorkJam or the My Learning Portal.

02 COMPLETE — Take the Safety Use of LPG Gas course and refresh your knowledge.

03 APPLY — Follow correct procedures and only use approved, serviced equipment.

04 SHARE — Encourage relevant colleagues to complete the training and discuss key learnings.

TAKE HOME SAFETY

PREPARE | CHECK | SLOW DOWN | STAY SAFE

WINTER DRIVING: BE READY FOR THE JOURNEY

Before setting off this winter, take a few minutes to check your vehicle and the conditions. Keep windows, mirrors and lights clear, make sure tyres are in good condition, check fluid levels and carry useful winter essentials.

Plan your route and check the weather before travelling. In rain, ice, snow or fog, slow down, increase the distance from the vehicle ahead and avoid sudden braking, steering or acceleration. Allow extra time for your journey and never drive until the windscreen is fully clear.

For longer journeys, consider carrying warm clothing, a torch, phone charger, water and basic emergency supplies. If conditions become severe, ask yourself whether the journey is really necessary.
