

What are the hazards and how might they harm?

Crush injuries, bruises, abrasions, cuts as a result of entanglement

Electric shock or burns from incorrect use or damaged/faulty equipment

What other precautions should be taken?

Visually inspect equipment and cable for any damage or defects, such as burn marks or frayed cables before use.

Dough rolling

Safety Task Card STCCS 20

Unit Managers – use page overleaf to list any hazards and control measures specific to your site which are not listed below

Safe System of Work

1. Make sure the dough roller is on a stable surface and at a comfortable working height.
2. Check that guards are in place and working correctly before use. Report any issues to your manager and do not use.
3. Keep lanyards, clothing and other items away from moving parts so that they do not become entangled and drawn into the machine.
4. Do not reach into the roller guard whilst the machine is operating or when it is connected to the power supply.
5. Keep clothing out of reach of rotating parts to prevent it from becoming entangled.
6. Switch off and isolate equipment before cleaning.

If you have any concerns, stop and speak with your line manager before proceeding.
